

Designed, remodeled, and created floor plans while effectively communicating with clients. Utilized CAD programs for designing such as Chief Architect and Sketchup. Managed full life cycle of project design from client interview to completion of design, specification, and submission of permit.

- Designed customized plans for clients' dream homes and reviewed plans with clients during a final personal plan review.
- Measured the home site and photographed ensuring Salesperson has documented the existing conditions.
- Reviewed designs with Design Team, Design Manager, and Salesperson for construction feasibility and cost implications before presenting preliminary drawings to the client.
- Oversaw workflow design collaborating with staff and subcontractors ensuring excellent customer satisfaction.
- Drew plans, elevations, 3-D perspectives, site plans, and construction documents related to the project.
- Worked with the clients throughout the design phase providing weekly updates while effectively communicating with the tradesmen with the changes made by clients which can influence the project design.
